Macquarie Data Centres.

Secure. Sovereign. Compliant.

Secure. Sovereign. Compliant.

We house and protect data for the world's biggest hyperscalers, cloud and AI, global Fortune 500 companies, multinational enterprises and 42% of the Australian Federal Government.

Our portfolio of data centres are highly connected and backed by certified engineering services to support even the highest density workloads.

We do hard well, and we've never met a reference architecture we couldn't handle.

More than colocation.

Australia's most experienced data centre operator with a 24+ year track record for operational excellence, safety and uptime.

Data centres purpose built for AI and cloud.

We're experienced in high-density and critical workloads with fungible designs that accommodate hybrid air and liquid cooling options.
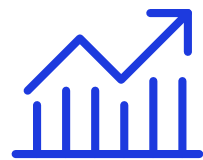

Operational Excellence.

Our data centres are supported by 200+ government cleared engineers who are onsite for everything from regular maintenance to urgent assistance for customers IT.
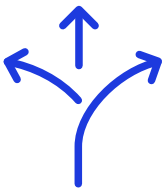

Compliant with the highest Government security standards.

Our sovereign data centres are part of Australia's critical infrastructure and are Certified Strategic by the Australian Federal Government.

Part of the ASX-listed Macquarie Technology Group.

We're all-Australian owned, with no foreign debt and a strong balance sheet to offer transparency and reliability.

Design and commercial flexibility.

We offer flexible and adaptable solutions for any reference architecture, alongside flexible commercial models.

We consistently achieve industry-leading NPS scores of 80+.

We wrote the book on customer service. Literally. NY Times best selling author Joseph Michelli wrote the book 'Customer Magic' on our market leading customer experience.

Australian market specialists.

A sovereign provider that knows the Aussie market better than anyone to offer you a secure gateway into Australia.

Partnerships built for agility and flexibility.

We offer flexible wholesale and partnership models to support you and your customers here in Australia.

Our strategically placed data centres can become a sovereign, secure and compliant part of your digital ecosystem. We're built for scale to accommodate you now, and grow with you in the future.

Home of Federal Government.

Our data centres support 42% of the Australian Federal Government.

Built to meet the most stringent government hosting frameworks and security requirements, our sovereign data centres are Certified Strategic by the Australian Government and form part of the nations critical infrastructure.

Leveraging our government-approved infrastructure gives enterprise customers the right certifications to sell to the Australian Government and its partners.

Meet our
Data Centres.
